Underground air raid shelters in Usti nad Labem are located in the hill slopes adjacent to Dulce Street. These shelters were constructed partly during World War II and are now being reactivated and extended. Galleries are protected by stone-brick walls 50 cm. thick which are cemented in place. Three exits are protected by special chambers against blasts and gas. The average depth of the galleries below the earth's surface is 20 to 25 meters.

Enclosure: 1 sketch of the underground air raid shelters in Usti nad Labem (Air 2, Army, State)
